

Dr. Steven Clendenen is an Associate Professor of Anesthesiology at the Mayo Clinic Florida and head of Regional Anesthesia and Acute Pain Medicine. His research interests include ultrasound guided spine imaging and treatment of pseudomeningocele following spine surgery, peripheral nerve injury, infrapatellar nerve entrapment following total knee arthroplasty, and 3-D ultrasound. He is running a research program in exploring the genetic explanation of local anesthesia resistance. He has authored several papers and book chapters, is a busy reviewer, and has lectured about ultrasound guided regional anesthesia topics around the world.
