* Associate Editor: Pain Practice. 2016-present

Main interests and contributions:

- Regional anaesthesia and postoperative pain management
- PhD thesis on spinal opioids
- Development of official monitoring recommendations for patients receiving spinal opioids
- Spinal opioids:special issues such as urodynamic effects, neurotoxicity, use in grossly obese patients
- Combined Spinal-epidural technique: first controlled study, introduced technique in USA(with Prof. Abouleish),epiduroscopy, EVE concept
- Organization of Acute Pain Services: introduced specialist nurse-based models, audits, nursing role
- Introduced patient-controlled regional techniques for pain management at home after ambulatory surgery
- Wound catheter and other infiltrative techniques for pain management after ambulatory surgery and in inpatients

- Development of procedure-specific, evidence-based postoperative pain management guidelines (PROSPECT)
- Pioneering contribution in educational activities in the field of regional anaesthesia by starting (in 2005) a diploma examination in regional anaesthesia under the auspices of European Society of Regional Anaesthesia and Pain Therapy (ESRA)
